

Ventilator Service Training

Leading with LectureShop™ Learning

South Pacific Biomedical provides comprehensive ventilator service training. When you train with SPB, you train with the best in the industry. We are experienced professionals highly skilled in delivering challenging, enlightening, and stimulating training programs. You will receive expert instruction, valuable information, and critical hands-on training - all at an affordable price. Our programs offer the most hands-on training in the industry. Our small, highly educational classes give you the greatest opportunity to work with state-of-the-art equipment and training materials. When you complete an SPB training program, you come away qualified with time-saving information, important hands-on training, vital diagnostic skills and industry accepted certification.

LectureShop™ Learning

Our exclusive LectureShop™ learning system guarantees virtually all hands-on training. LectureShop™ balances the requirement of technical information with the need for realistic hands-on simulations and practice. It's simply the best way to conduct service training.

Our Goal is Your Education!

Expert Instruction

We are experts in the field of critical care ventilation service, support and training. We have over 15 years of dedicated ventilator technologies experience. And we excel at teaching too, because great classes require not only experts, but also skilled instructors. You can rest assured our training programs are highly informative, educational, instructive, challenging, and stimulating.

Expert Diagrams & Materials

When you complete a South Pacific Biomedical training program, you come away with practical hands-on training, vital diagnostic skills and loads of valuable, time-saving information such as detailed full color technical diagrams, photos, worksheets, workshop manual, and more!

Test Equipment & Technical Support

Train with the best equipment available in the industry! Our classroom is equipped with the latest state-of-the-art test equipment. And after training, should you have any questions, we'll be there.

Course Summary

Our courses are developed to insure technical accuracy and are kept current by continuously monitoring FDA recall notifications and the original manufacturer's latest available, published materials for usage, updates, testing requirements, and other recommendations.

Hands-On Training... ...for Hands-On Professionals

Customer Comments

Please don't just take our word for it, listen to what our customers have to say...

"The class was very detailed. The instructor is very articulate, he delivered the material well. The class was very interesting and I've learned a lot. Thanks SouthPB!"

Tamara A.

"I was pleasantly surprised by the small class size. Given the chance I would definitely take other courses through South Pacific Biomedical."

Ken L.

"Beyond Excellent!" Enjoyed everything...this was a great course. Thank you."

John N.

"I've been to several ventilator classes and this has been the best taught so far."

"The instructor was very thorough and was eager to answer any questions and to give us plenty of problem simulations. This training is A+ material. Thank you!"

"Great course. Information was very clear and detailed. Instructor is very knowledgeable on equipment."

"Class was fun and knowledgeable. Good atmosphere and learning experience."

"Most informative class I have ever been to. This class not only met my expectations it exceeded them. Well done!!"
